There are plenty of books on how to write, but few until now on how to get your book published. This book, written by a publisher, also draws on her research and interviews with fellow publishers and with agents. It details every stage in the process, from writing a proposal, through finding an editor and hooking a publisher. It even covers self publishing, understanding contracts and increasing your sales. It covers various genres including fiction, non-fiction, children's books and poetry.
