“This is the story of a very confused young man who grew up in a volatile home, was guided by music, witnessed the downfall of Detroit and set out to find his muse. Along the way, he made some discoveries about the world and himself, barely survived many situations and lived to tell the tale. The book covers my life from birth to age twenty and sets the stage for books two through five. Nobody Cares Who You Are is a journey of the mind, body and soul.
