Renee Montgomery was a woman that didn't need anyone's help.

When things got rough then she turned the tables on them. Being the only female bartender in the little bar she found herself the object of many unwanted touches and gestures. Finally deciding it was too much she takes matters into her own hands until someone steps in to take care of it for her. Headstrong and stubborn she refuses to accept the help and ends up pushing the man away. When attacked late one night she is grateful that Stephen has again showed up to be her knight in shining armor. After a night of heated passion she finds out something that she can't grasp. Can she accept him for who he is or will she walk away forever? **WARNING:** This ebook contains mature themes and language. 18+ readers only!
