A Pandora's Children Single I have decided to pull five of my favorite stories from my Pandora's Children collection and release them as \$.99 standalone stories. In "Roadside Memorial", an elderly ex-con is targeted by the men he helped to send to prison a decade ago. But when a bullet meant for him finds a young child instead, he uses his powers to right this horrible wrong in a most brutal fashion (23,000 words) Please note that this story has been previously published in Pandora's Children Book 2: Too Young To Die (\$1.99) and Pandora's Children: The Complete Nightmares Book 2(\$2.99), so if you have read either of those, don't bother with this. But if you haven't delved into the Pandora's Children books yet, and don't want to spend more than \$.99, this is a good place to start.
