The basic building block to learning and communicating is the written and spoken language. If your child cannot express his thoughts or ideas well, he will be shut off from the fruits of understanding and success in life. The fundamental of speech and writing, grammar, has always been taught as a complicated, confusing and constricting set of rules that very few people understand. Until now. This revolutionary book contains easy-to-read text and is full of illustrations that make effective communication with grammar simple to understand.

With this unique approach, children can gain the ability to communicate their ideas well-something which is vital to preparing them for life. Suitable for children from ages of 8 to 12 years old.
