In these thrilling (and sometimes chilling), real-life criminal investigations, forensic scientists piece together evidence to try to figure out who dunnit! Have you ever wondered how the police catch their killer? They have lots of help from forensic specialists, who use clues in, on, and around the body to help build a case.

Travel to a morgue to see how forensic pathologists can find evidence hidden in a corpse. Dust the crime scene for fingerprints to help find suspects.

Learn how to use DNA to put murderers un jail--or to free innocent people!
