Booklet featuring essays and more for Slacker, directed by Richard Linklater (Dazed and Confused)..

Slacker presents a day in the life of a loose-knit Austin, Texas, subculture populated by eccentric and overeducated young people. Shooting on 16 mm for a mere \$3,000, writer-producer-director Linklater and his crew of friends threw out any idea of a traditional plot, choosing instead to create a tapestry of over a hundred characters, each as compelling as the last. Slacker is a prescient look at an emerging generation of aggressive nonparticipants, and one of the key films of the American independent film movement of the 1990s.
