Why Believe? When You Can Know! by Alan Valiant In this amazing book, the facts supersede religious belief. Your life will never be the same after learning the revealing information because you will have the knowledge that man has sought for centuries. You cannot afford to go through life without knowing what lies ahead of you. Most people think that they have to believe in a prescribed religion or dogma in order to get through life and be saved from the consequences of their sins after they die.

Because the facts of our existence are so different from the universally held beliefs, it is vital that we discover the truth before we return whence we came, that is to heaven or the spiritual world, as some may prefer to call it. To return burdened by false beliefs only sets us back spiritually as it takes a long time to replace one's beliefs by a knowledge of the facts.

The only thing of real importance is knowledge. Of what use is belief if it turns out to be wrong? Once you know the facts, your whole life changes for the better and the uncertainty of whether you are following the right path disappears. You will know why you are the way you are and you will know the way to go ahead in order to fulfil your destiny.

When you realise that you create your own future by the way you behave now, you will see the futility of

proceeding on a wayward course and will understand that every act has an effect on you as well as on others.
