The last thing Ruby Beg remembers is terror: strange figures in her room, a hand over her mouth, and suffocation... When she wakes up, she's bound, hand and foot, in a dark forest. And she's not alone. But the dark, ragtag group of men who have taken her from her home don't appear to be wishing her harm. Instead, they want to take her across the country based on a story so far-fetched that Ruby can't bring herself to believe it. Until they show her proof her confused memory can't ignore.

Will Ruby turn back to Killybeg, to Wyn, to everything she's ever known and trusted? Or will she take the chance that the story these strange men are telling her could be the key to a life she didn't know she'd lived? Find out in the second installment of The Hummingbird Saga, the tale of the love, loyalty, and lies in Ruby Beg's life. And the past that is rapidly coming to claim her.
